

## A CHERISHING DREAM A BUDDING LEGACY

One of the main focus areas of The Takiyans is to encourage the immense potential of the young generation and try to inculcate a culture of independent thinking. The current generation of school going children is put under severe pressure from all sides to learn recipes for excellence to achieve success in life. The joy of learning and free thinking is lost and some of the finer faculties of a human being are not being developed, and perhaps not even being encouraged. Even in the stereotypical extra curricular activities there is often a mandate on them for excellence and the joy part is forgotten. The Takiyans, as a start, wants to organise small meets for school children and involve them into various activities where only excellence may not be the last word, instead, enjoyment in being able to observe, scrutinise and think analytically on their own, as well as appreciate the beauty of fine arts, literature and culture, will be encouraged. The above is easier said than done. However, one can try and start.

Need for **better life**

## ABOUT THE TAKIYANS

We are a young non profit social welfare organisation with a motto to bring social reformation by primarily focusing in encouraging the immense potential of current young generation and trying to inculcate a culture of independent thinking and rationality.

TOGETHER WE DREAM  
TAKI HOUSE IN OUR GENE

## EDUCATION, CULTURE AND HEALTH

FEATURED

ANWESHA, our own publication, encompasses literary works including but not limited to the nostalgic trip back to the golden days at our Taki Boys and Taki Girls school. Our Cultural Team creates artsy, modern productions in recitation, music, dance, theatre and many more. Our Medical Team organises HEALTH CAMPS with an intension to serve the underprivileged. Our Academic Team organises small meets to the school students and involves them in various activities like interactive sessions and aptitude camps where involvement is preferred over excellence.

## OUR AREA OF WORK

Observing the gradual diminish of joy of learning and free thinking, poor health due to financial constraint, not serving essential encouragement for human brain development, we came up with an idea of arranging following activities for a better tomorrow.

- Health Camps to serve underprivileged
- Encourage immense potential of young generation
- Organising rich cultural, social programme
- Interactive sessions on independent thinking
- Aptitude camps for natural growth of knowledge
- Raising funds for needy students, alumni etc.

## THE TAKIYANS QUIZ

FEATURED

It is a fascinating platform for the high school kids to demonstrate their skills of analytical & cohesive thinking. It does not ask questions based on their curricula but challenges them to acquire, assimilate & associate information with rationality & logic. We are receiving excellent response from schools and are committed to make the next version even bigger, better, more challenging and greater fun.

## WE SOLICIT

With your active support and participation we aim to reach numerous schools, orphanage etc. for our various programmes. We request your help in arranging such programmes in terms of accommodation or funds or medicines or as the case may arise. We are very hopeful that you or your organisation will whole-heartedly join hands with us to fulfil this dream so that our next generation may get to live in a better world.
